

Krantz Clean Air Solutions

# Krantz Clean Air App

Mobile monitoring

Mobile monitoring with the Krantz Clean Air App:  
All system data for control, maintenance, short-term adjustments and long-term system optimisation

## Full control with the Krantz Clean Air App

The precise integration of sustainable exhaust air purification concepts into production technology distinguishes the systems from Krantz Clean Air Solutions. With the new Krantz Clean Air Monitoring App, the interaction of the plant systems is even more successful. All relevant data always in view for control, maintenance, short-term adjustments and long-term system optimisation.

The ideal tool for plant technicians and production managers. All relevant data always available. With detailed status archive. Ideally suited for comparing system values when production requirements change.

### Mobile monitoring at any time:

- Plant status in real time
- Operating parameters at a glance
- Process panel with all details
- Push notes when limit values are reached
- Status archive for comparison of operating states

### Krantz Clean Air Monitoring App

All data always in view for control, maintenance, optimisation.
